Skills: C#, .Net8, Entity Framework, HTML, CSS, JavaScript, Blazor, SQL Server, Restful API, Web Service, OAuth 2.0, Unit Test, Integration Test, Debugging, Visual Studio, Azure, Docker, Kubernetes, CICD, Agile.

WORK EXPERIENCE

Chevron

San Ramon, CA

Software Engineer - IT Operations Management

Jan 2021 - Present

- Implemented backend Restful API using C#, .NET and Azure monitor to allow users to ingest and manage custom metrics log from the company web application, increases application's health visibility and reduce major incident, using OAuth 2.0 for authentication.
- Implemented a scheduled job using C#, Azure Function and ThousandEyes API to remove and disable unused monitoring tests in the ThousandEyes Vendor Application, reduce enterprise license fees by 40% annually
- Implemented backend Restful API using C#, .Net and Azure Function to allow user to create, read, delete, update monitoring tests in ThousandEyes account group, reduce 90% support tickets, fully automate the test management in ThousandEyes.

Chevron

San Ramon, CA

Software Engineer - IT Service Management

Jan 2019 - Jan 2021

- Developed a REST API in C# to enable seamless CRUD operations on the CMDB, enhancing data management efficiency.
- Engineered a new hire onboarding application using Angular and .NET, achieving 100% user satisfaction through an optimized user experience.
- Led a Cloud Migration project, modernizing oil refinery applications written in .NET for Azure hosting. This initiative accelerated the enterprise data center decommissioning process and resulted in significant operational cost savings.

PROJECT EXPERIENCE

Personal

Fremont, CA

Gifting Web App | C#, Angular, Azure

- Developed an app offering personalized gift suggestions by leveraging user responses and integrating Azure Machine Learning Studio for advanced data analysis. Implemented product queries using Amazon's API and deployed the application to Azure App Service via GitHub Actions.

Personal

Fremont, CA

Cloud Resume Challenge | Terraform, Azure

- Created a web app hosted in Azure Storage Account to showcase my resume, integrating an Azure Function to monitor visitor counts and storing the data in Azure Cosmos DB for real-time analytics.

CERTIFICATIONS
