

Yongding Sun

PROFILE

ServiceNow Developer with over 6 years of hands-on experience designing and implementing robust solutions across ITSM, ITOM, ITAM and CMDB modules. Proven expertise in developing custom applications, configuring workflows, and integrating enterprise systems. Passionate about leveraging automation, continuous learning, and team collaboration to deliver impactful ServiceNow solutions.

CONTACT INFORMATION

Phone: 530-414-5845, Email: sydkaka@icloud.com

SKILLS

- ServiceNow Modules: ITSM, ITOM, ITAM, Discovery, Service Catalog, CMDB, Service Portal, Workflow Editor, HAM, SAM, Flow Designer, Integration Hub, ServiceNow Studio IDE
- Programming & Scripting: HTML5, JAVA, JavaScript, jQuery, CSS, Angular, REST API, JSON, SOAP, XML, Client Scripts, Business Rules, UI Policies/Actions, Scripted include
- Integration & APIs: REST API, SOAP, MID Server, OAuth, Webhooks
- Cloud & Infrastructure: Azure
- CI/CD & DevOps: GitHub Actions, Azure DevOps

EDUCATION

- B.S. in Computer Science, California State University of Chico
- M.S. in Software Engineering, California State University of Fullerton

CERTIFICATIONS

- ServiceNow: Certified System Administrator
- ServiceNow: Certified Application Developer
- ServiceNow: Certified Implementation Specialist - Discovery
- Microsoft Certified: Azure Fundamental

EXPERIENCE

Shutterfly: 2025 - Present

- Sole full-time ServiceNow expert overseeing all aspects of the platform across development, administration, architecture, and project delivery.

- Led end-to-end delivery of ITSM enhancements to improve user experience, transitioning from email-based incident handling to structured Service Catalog workflows.
- Designed and implemented automated catalog item fulfillment using Flow Designer and IntegrationHub, significantly reducing manual workload and response times.
- Architected and executed ReadyCloud integration to track returned IT assets, streamlining asset recovery and reducing lost equipment incidents.
- Resolved complex LDAP user sync issues and redesigned role assignment logic to reduce unnecessary ITIL role usage, improving security and compliance.
- Acted as Product Owner and Scrum Master to establish Agile 2.0 and Team Agile in ServiceNow, managing sprint planning, backlog grooming, and delivery tracking.
- Implemented Microsoft Teams integration to allow real-time ticket status updates and agent collaboration, improving communication and transparency.
- Collaborated cross-functionally with IT leadership, InfoSec, HR, and contractors to drive platform governance, roadmap planning, and continuous improvements.
- Established and normalized the Computer class in CMDB by integrating Jamf (macOS) and Intune (Windows) for automated hardware inventory and compliance tracking, ensuring complete visibility across the enterprise device fleet.

Chevron: 2019 - 2025

- Integrated Azure Monitor, ThousandEyes, and AppDynamics with ServiceNow Event Management to capture and correlate application events, reducing incident response time by 40%.
- Designed self-healing automation for Azure VM anomalies (e.g., high CPU, low disk) using Flow Designer, Azure runbooks, and PowerShell, improving system uptime and reducing manual interventions.
- Configured Azure VM change tracking and CMDB synchronization, increasing CMDB accuracy and visibility across infrastructure assets.
- Integrated ServiceNow CMDB with Intune, Tanium, and Azure Resource Graph, ensuring complete visibility of mobile and cloud infrastructure assets.
- Implemented Cloud Discovery and IP-based Discovery for devices behind Chevron's firewall (IoT, printers, switches).
- Deployed CSDM framework and Service Mapping, improving CMDB structure and application dependency tracking.

- Developed REST Scripted APIs for Incident, Change, and Request modules, enabling real-time PowerBI reporting and third-party integrations.
- Created ATF test suites for catalog items, reducing post-upgrade defects by 70%.
- Led the decommissioning of Remedy and synchronized its data into ServiceNow CMDB, enabling a unified platform across the enterprise.
- Created catalog items for Azure resource provisioning and developed custom widgets in the Service Portal to enhance user experience.
- Unified the Chevron IT Service Portal with custom theming and branding.
- Set up CI/CD pipeline for streamlined code deployment and implemented a Virtual Agent to handle frequent end-user requests.
